Contents:

Sample Kit #3000—Hot Glass Colors

Contains 1 oz:

HG9001—Jet Black

HG9002—Flash Yellow

HG9005—Flame Orange

HG9007—Chrome Green

HG9010—Cobalt Blue

HG9012—Laser Red

HG9014—Turquoise

HG9015—Fusion Brown

HG9020—Mixing White

HG9021—Thunder Grey

Contains 1/2 oz:

G1795—Gum Arabic

1903—Hand Painting Medium (oil based)

D1368—Hand Painting Medium (water based)

Instructions:

Firing Temperature—1250-1520 F

Mixing: All Reusche colors come in a powder form and need to be mixed with a vehicle before application.

Each kit includes Gum Arabic, and two different types of mixing mediums.

Mixing with Gum Arabic: Start with the color. Place a small amount onto a ground glass slab and flatten the color to approximately 1/8" thick. Sprinkle the Gum Arabic over the color, just enough to look like freshly fallen snow. You should be able to see color underneath. Add water in small amounts mixing between additions. You want a consistency similar to yogurt. The paint should be soft but retain its shape. If the color spreads out on your slab, it is too thin. More color can be added to the mixture to thicken.

Mixing with oil based or water based medium: The recommended ratio for mixing with most mediums for hand painting is 80 % color by weight to 20 % medium by weight. Weigh your color, add your medium and mix to a smooth consistency similar to yogurt.

There are many different oils and mediums that can be used for mixing your color. Refer to the book "The Art of Painting on Glass" by Albinas Elskus for more helpful information on different mixing mediums and techniques.
